Safety stock: 4 weeks after launch. **Subcontractors:** Release testing proposed at HarborPoint QC; subject to Caldova approval.

2. Technology-transfer plan

The transfer plan uses controlled inputs and gated approval. No PPQ activity begins until methods, master records, cleaning strategy, critical materials, and deviations are approved.

- Week 0 · Kickoff**
Governance, document index, risk register, and responsibility matrix.
- Weeks 1-4 · Knowledge transfer**
CAL-MBR-201-TT-01, CAL-SPEC-OSD-201-01, process history, methods, and material controls.
- Weeks 5-8 · Site adaptation**
Equipment mapping, gap assessment, draft batch records, cleaning and sampling plans.
- Weeks 9-12 · Method and engineering readiness**
Analytical transfer, engineering protocol, raw-material qualification, operator training.
- Weeks 13-10 · Execution gate**
Engineering batch review and PPQ readiness decision.

RESPONSIBILITIES

Workstream	Caldova	Atlas Regional Manufacturing
Product knowledge	Specifications, history, methods, MBR inputs	Gap assessment and receiving-site procedures
Materials	Approve critical sources	Qualify, procure, sample, test, inventory
Validation	Approve strategy and protocols	Draft and execute approved protocols
Release	Final disposition for Caldova use	Site quality disposition and complete release package

Principal implementation risk: Firm capacity is below the 400,000-tablet requirement and current performance trend is declining.

Exception: Can reserve only 300,000 tablets per month as firm capacity; up to 80,000 additional tablets are best-efforts surge capacity.
